

DentaKote Classic

10 reasons dentists MUST use DentaKote Classic

1. Reduce the accumulation of bacterial microbiota on restorations
2. Lower the incidence of Peri-Implantitis... “prevent” rather than “treat”
3. Simplify patient home hygiene around restorations
4. Help prevent cervical bone loss due to bacterial invasion
5. Prevent stains and odors from restorations
6. Reduce office staff burden & time in cleaning dentures & prosthetics
7. Can significantly lower restoration do-overs (remakes)
8. Improve restoration longevity...stays newer & fresher
9. Decreases gingival irritations around restorations
10. Significantly reduces/eliminates odors from removable restorations

DentaKote S

5 reasons dentists MUST use DentaKote S routinely in their practice

1. Eliminate root sensitivity immediately
2. Halts patient complaints returning sensitivity so quickly
3. Applied by staff in minutes. Dentist’s time is used more productively
4. Simple application and lasts a long time (*yearly re-application recommended)
5. Patients can enjoy their cold foods and beverages once again

*Can be billed to insurance as well as some policies do have coverage for desensitizing agents and applications for medicinal agents.
